Homework 3 – PHP Forms

Complete the Presidents Form by including text boxes/drop down lists matching all the possible key values (use the array_search function).

Text Boxes:

- First Name
- Last Name
- First Lady
- State
- Party

Drop Down Lists:

- Term Number
- Starting Year
  HINT: Copy the associative arrays into choosePresident_2018.php. Use a foreach loop to build the drop-down list – term number is listed below:

    <p>Term Number: <select name="term">
    <option></option>
    <?php
        foreach($presidents as $onePresident) {
          echo "<option
            value='".${$onePresident}['term']."'>".${$onePresident}['term']."</option>";
        }
    ?>
    </select>

A sample output file has been provided on the next page.

Say I enter "Republican" for party; my form should display

Name	First Lady	State	Party	Term(s)	Start
Dwight D. Eisenhower	Mamie Eisenhower	Kansas	Republican	42 & 43	
Ronald Reagan	Nancy Reagan	California	Republican	49 & 50	
George H. Bush	Barbara Bush	Texas	Republican	51	
George W. Bush	Laura Bush	Texas	Republican	54 & 55
